

THE OPEN UNIVERSITY OF JAPAN

From "Education and Learning Vision 2027" by The Open University of Japan
The Open University of Japan's Social Mission

1

Provide broad and diverse support for lifelong learning in the era of the 100-year lifespan

2

Provide a variety of recurrent education opportunities for job development and career advancement

3

Open the path to a degree to the public at large

4

Contribute to the advancement of higher education in terms of content and methods
by promoting academic research and educational innovation

Greetings from the President

Thoughts on where we've been and where we're going on our 40th anniversary

With our establishment in 1983, The Open University of Japan is now celebrating its 40th anniversary. Institutionally, we are a private university founded by a special school corporation, The Open University of Japan Foundation, which was established based on the Act on the Open University of Japan. However, in terms of the process of our establishment and the scale of government subsidies, we share characteristics that are very similar to a national university. Our origin can be found in the then Minister of Education's consultation with the Council for Social Education half a century ago in 1967 regarding the ideal of specialized educational broadcasting through video and FM broadcasting. In the background of all this there was firstly a range of different educational reforms being sought regarding problems such as the closed nature of university education, that had come to light during conflicts between schools and students; secondly, people were exploring the possibilities of using the practical applications of UHF and FM broadcasts for education, and thirdly, around the world, prevailing trends were moving more toward promoting lifelong education. In response to this consultation, in 1969 the Ministry of Education announced "About the Establishment of 'The Open University of Japan,'" which went on to become the name of the school. It is because of a start with this background that the Open University of Japan advocates university learning "whenever, wherever, and by whomever," affording our school a multifaceted objective (social mission) that some of the other legendary universities cannot even boast. That objective is our mission to: 1. provide a wide range of university education opportunities to working adults as a lifelong learning institution; 2. guarantee flexible university entrance opportunities for new high school graduates as new higher education system, and 3. disseminate broadcast teaching materials in cooperation with existing universities, credit transfers, and faculty exchange, thereby improving university education on the whole. Currently, in response to the demands of society, we have added 4. the promotion of recurrent education related to occupations and qualifications.

Prof. Masaya Iwanaga, Ph.D.
President, The Open University of Japan

The Open University of Japan today is not only Japan's largest remote open-university offering bachelor's degrees, but it also offers a master's program at the School of Graduate Studies and a Ph.D. Program. In addition to transmitting classes over a TV and radio broadcast satellite channel, we offer about 400 classes each semester, including online courses over the Internet. Face-to-face courses at 57 study centers and satellite spaces nationwide, which were temporarily held back due to the COVID-19 pandemic, have resumed, with approximately 3,000 classes offered annually. Live, simultaneous interactive web-based classes, which can be taken from anywhere in Japan via the Internet, began in FY2022. The curriculum offered, both undergraduate and at the School of Graduate Studies, rivals that of comprehensive universities, including health sciences, life sciences, developmental sciences, social sciences, humanities, informatics, and natural sciences. Today, about 85,000 undergraduate and graduate students all over the country are diving into subjects they want to study at their own pace.

With this landmark on its 40th anniversary, The Open University of Japan will continue to value its traditional face-to-face instruction while further advancing digital transformation (DX) and striving to become an institution of higher education that easy to learn from and is truly open to the nation and the world. We hope you stay tuned for the next 10 years at The Open University of Japan.

Note: During FY2020 and 2021, many courses were closed or switched to online classes due to complications arising from COVID-19.

History

| | |
|-----------|--|
| Apr. 1983 | The University of the Air (U-Air) was established |
| Apr. 1985 | Undergraduate students were accepted and broadcast lectures were started |
| Jan. 1998 | Nationwide digital broadcasting via CS (communications satellite) was launched |
| Oct. 1998 | Students enrolled in undergraduate degree programs were accepted at Study Centers throughout Japan |
| Apr. 2001 | The School of Graduate Studies was established for the Master's Program |
| Dec. 2006 | A terrestrial digital broadcasting service was launched (for the Kanto region only) |
| Oct. 2007 | The University of the Air was renamed The Open University of Japan (OUJ) |
| Oct. 2011 | Nationwide digital broadcasting via BS (broadcast satellite) was launched |
| Oct. 2014 | The Doctoral Program was launched at the School of Graduate Studies |
| Apr. 2015 | Online courses were launched |
| Apr. 2017 | The Center for Online Education (COE) was established |
| Apr. 2018 | The Research Institute for Learning and Education Strategies (RILES) was established |
| Oct. 2018 | Additional BS channels were made available to offer a variety of programs (shift from terrestrial digital broadcasting) |
| May.2020 | Webcast Open Lectures were started |
| Apr. 2022 | Live Web Courses were launched |
| Jul. 2022 | Trial examination for credit approval by Internet-Based Testing (IBT) was launched |
| Mar.2024 | Next Generation Education Research and Development Center was established |

Faculty of Liberal Arts

Admission Policy

In order to achieve the University's educational philosophy of providing opportunities for higher education to the public at large, the University will not select students for admission, but will seek the following types of students:

1. The applicant must have the knowledge and ability of a high school graduate to understand the content of study once admitted.
2. The student must be willing and able to sustain a positive approach to media-based learning.

In addition, in order to make learning at the University more effective, the following is desired upon admission:

- Students must be willing to learn together with others from diverse backgrounds.
- Students are required to take courses open to the public by the University to motivate them to learn before enrolling in the program.

| Courses | Educational Goals |
|--|---|
| Studies of Living and Welfare | Acquire concepts and knowledge of various issues related to daily life such as food, clothing, shelter, family, health, and welfare. In addition, students will gain a broad understanding and practical knowledge of various issues related to daily life in modern society, including food, clothing, shelter, family, health, and welfare. |
| Studies of Psychology and Education | Acquire concepts and knowledge of complex issues related to the human mind, development, and education. In addition, students will gain broad knowledge of supporting education and development in today's society. |
| Studies of Society and Industry | Acquire specialized knowledge of the basic workings of society and industry, as well as the skills to live in a sustainable and prosperous society. In addition, students will gain interdisciplinary knowledge of how society and industry work and a wide range of skills related to a sustainable and prosperous society. |
| Studies of Humanities and Culture | Acquire knowledge about the state of culture created by humans, including thought, art, history, and literature. In addition, students will also gain a broad knowledge of the various disciplines and methods related to the cultures that humans have created. |
| Informatics | Acquire knowledge and skills in informatics. In addition, students will gain knowledge of the humanities, social sciences, engineering, and natural sciences necessary for practical problem solving. |
| Studies of Nature and Environment | Acquire knowledge of aspects of nature based on scientific evidence. In addition, students will also gain knowledge about the relationship between human activities and nature, and about practices and decisions for a sustainable future. |

Undergraduate and Graduate Studies Structure

THE OPEN UNIVERSITY OF JAPAN

Faculty of Liberal Arts

- Studies of Living and Welfare
- Studies of Psychology and Education
- Studies of Society and Industry
- Studies of Humanities and Culture
- Informatics
- Studies of Nature and Environment

Graduate School of Arts and Sciences, The School of Graduate Studies

Master's Program

- Human Life and Health Sciences

- Informatics
- Natural and Environmental Sciences

Ph.D. Program

- Human Life and Health Sciences
- Human Sciences
- Social Governance
- Arts and Humanities
- Informatics
- Natural Sciences

Number of courses offered in FY2023

| Faculty of Liberal Arts | The School of Graduate Studies Master's Program |
|----------------------------|---|
| Television: 168subjects | Television: 5subjects |
| Radio: 122subjects | Radio: 49subjects |
| Online courses: 47subjects | Online courses: 35subjects |

Educational System

The Open University of Japan offers three types of courses: broadcast lecture courses, face-to-face courses (schooling), and online courses, with each class offered in one of these formats. Class instructors consist of experts from a number of public and private universities.

Broadcast Lecture Courses

Students earn credits by watching or listening to class programs broadcast on BS TV (231ch), BS radio (531ch), etc., and learning through printed materials, submitting mid-term assignments, and taking exams to earn credits. Each course is 2 credits, with 15 times, 45-minute class programs for viewing. Broadcast programs are broadcast nationwide through BS broadcasting and cable TV. Current students may also view the program via the Internet.

- Some subjects can also be viewed on channel 232.
- Some TV subjects are available exclusively via Internet streaming.

Face-to-Face Courses (Schooling)

These are classes in which students can receive direct instruction from faculty members at Study Centers and other locations. In addition to classroom lecture style classes, there are also hands-on training style classes at locations other than Study Centers. Each course is 1 credit and consists of 8 classes (7classes 90minutes and 1class 45minutes).

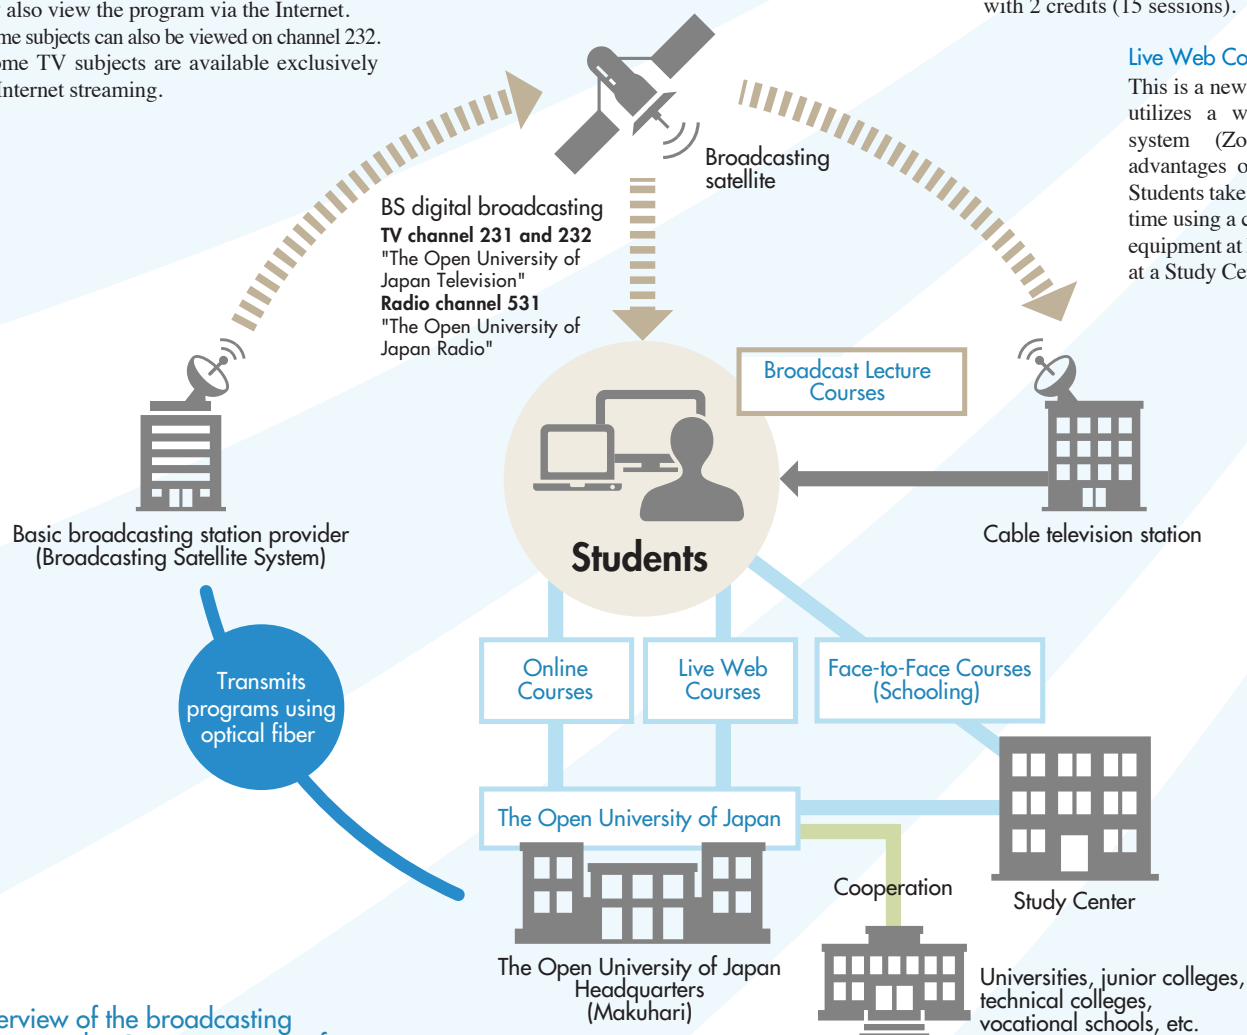

Online Courses

Established in 2015. Students watch lectures and complete assignments (multiple-choice questions, discussions, reports, etc.) using a computer or other device connected to the Internet. This class is graded by in-class learning activities. Each session lasts about 90 minutes (about 45 minutes for lectures and 45 minutes for learning activities), and there are courses with 1 credit (8 sessions) and courses with 2 credits (15 sessions).

Live Web Courses

This is a new class format that utilizes a web conferencing system (Zoom) with the advantages of online classes. Students take the course in real time using a computer or other equipment at home, rather than at a Study Center.

Overview of the broadcasting system at The Open University of Japan

The Open University of Japan broadcasts nationwide via satellite (BS broadcasting). The Open University of Japan Headquarters at Makuhari is equipped with studio facilities for producing, and master facilities for transmitting broadcast programs. Programs are sent via optical fiber from The Open University of Japan Headquarters to the key broadcasting station provider, which owns a broadcasting satellite, the Broadcasting Satellite System Corporation.

2015 Third class style established in addition to broadcast lecture and face-to-face courses

Online courses offered

Online classes, in which students watch lectures on the Internet and submit assignments (quizzes, discussions, reports, etc.) in a set period of time for each subject, were established in 2015 to promote learning.

2022

Web-based credit exams introduced

The Internet-Based Testing system (IBT) was introduced to allow students to take exams anytime, anywhere during the exam period via the Internet, whereas in the past exams were administered at designated dates and times at Study Centers, etc.

2022

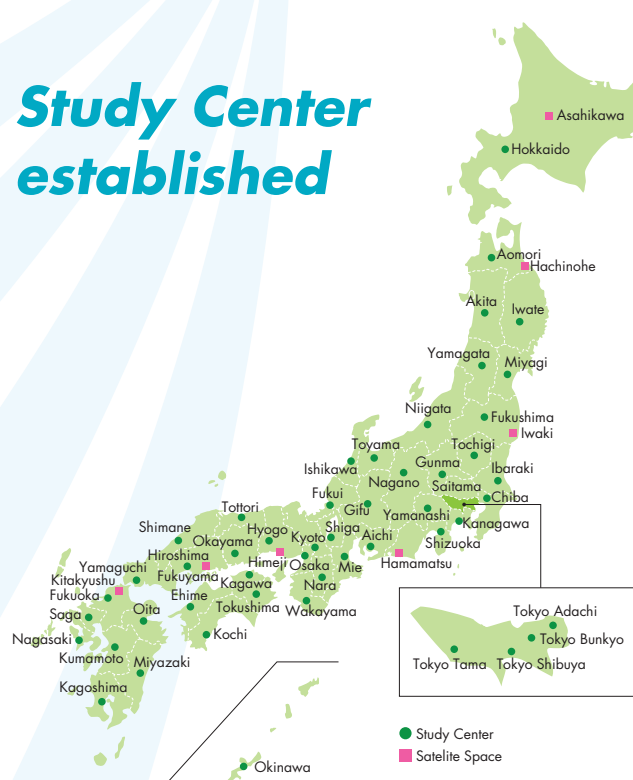

New educational format introduced in the wake of the COVID-19 pandemic

Live web classes started

Started simultaneous interactive remote learning classes using a web conferencing system, allowing students to attend classes from home and participate in Q&A sessions and discussions. The system is being expanded and improved with the aim of full-scale operation starting in FY2023.

Study Center established

Number of students enrolled (FY2022)

[Faculty of Liberal Arts]

(Unit: People)

| Type of student, etc. | Number of students enrolled in the first semester | Number of students enrolled in the second semester |
|----------------------------------|---|--|
| Regular students | 59,817 | 59,892 |
| One-year non-degree students | 15,688 | 14,981 |
| One-semester non-degree students | 5,053 | 5,995 |
| Special auditing students | 980 | 3,083 |
| Total | 81,538 | 83,951 |

[The School of Graduate Studies]

(Unit: People)

| Type of student, etc. | Number of students enrolled in the first semester | Number of students enrolled in the second semester |
|---|---|--|
| Master's regular students | 799 | 789 |
| One-year non-degree students (master's) | 2,532 | 2,451 |
| One-semester non-degree (master's) | 370 | 506 |
| Special auditing students | 17 | 8 |
| Regular students (Ph.D.) | 71 | 71 |
| Total | 3,789 | 3,825 |

Number of graduates Undergraduates: 6,534 / Masters: 228 / Doctorate: 8

Attributes of current students (2nd semester, FY2022)

High school and former junior high school: 2.5
Junior college, etc.: 1.2
Specialized training college: 4.7

International Exchange Initiatives

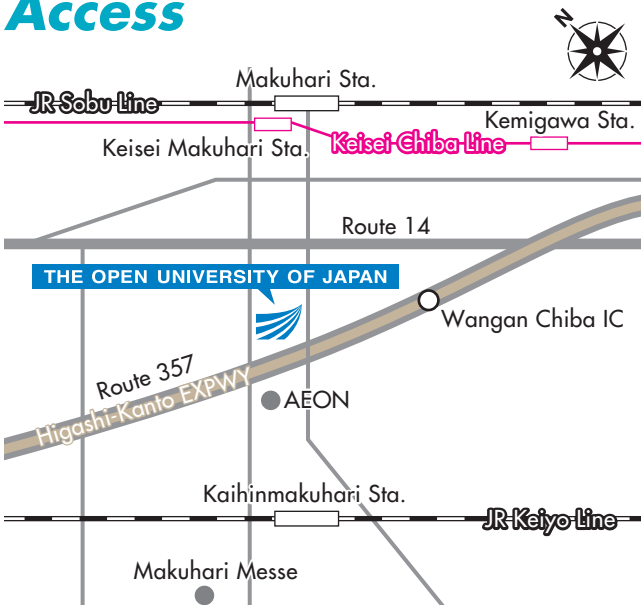

As of March 2024, The Open University of Japan has exchange agreements with 13 open universities and other institutions overseas. We are trying to further strengthen cooperation through presentations at international conferences of which our university is a member and observational visits to overseas universities with which we have cooperative exchange agreements. We are also actively involved in international exchange by inviting speakers from overseas distance learning institutions, hosting international symposiums, holding OUI-OUC-KNOU International Seminar, and accepting many visitors from abroad.

| Overseas universities with cooperative exchange agreements with The Open University of Japan (as of March 2024) | | |
|---|--------------------------|--------------------|
| Institution | Country/region | Date of agreement |
| Royal University of Bhutan | Bhutan | August 18, 2017 |
| Universidade Federal de Mato Grosso | Brazil | September 28, 2018 |
| Athabasca University | Canada | September 19, 1992 |
| The Open University of China | China | May 7, 2009 |
| The Hellenic Open University | Greece | September 26, 2023 |
| National University of Mongolia | Mongolia | October 15, 2019 |
| Korea National Open University | Rep. of Korea | September 22, 2008 |
| Universitat Oberta de Catalunya | Spain | August 1, 2014 |
| National Open University | Taiwan | April 16, 1993 |
| Sukhothai Thammathirat Open University | Thailand | May 15, 2012 |
| Anadolu University | Turkey | January 26, 2024 |
| The Open University | United Kingdom | August 26, 2008 |
| University of Maryland Global Campus | United States of America | November 15, 2009 |

The Open University of Japan actively participates in international activities as a member of the following international organizations:

- AAOU (Asian Association of Open Universities)
- ICDE (International Council for Open and Distance Education)
- The 1EdTech Consortium, Inc.
